1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Yang et al. (US/6,827,067 B1).

3. Yang et al. discloses a four-stroke cycle, four-cylinder reciprocating internal combustion engine having a crankshaft, four pistons, each reciprocal within a corresponding one of the cylinders, an intake poppet valve and an exhaust poppet valve for each cylinder, an intake camshaft for operating the intake valves, and an exhaust camshaft for operating the exhaust valves, the exhaust camshaft having primary lobes, each primary lobe normally opening the corresponding exhaust valve during an exhaust stroke of the corresponding piston, a method for internally recirculating exhaust gases, the method comprising: communicating exhaust gasses from the cylinders to an undivided exhaust manifold', and re-opening the exhaust valve near an end of an intake stroke of the corresponding piston, and allowing a pressure pulse in the exhaust manifold to cause a portion of the exhaust gases in the exhaust manifold to recirculate back into the corresponding cylinder. The closing of the intake valve slightly before the

exhaust valve is closed by the secondary lobe is shown as line 221 figures 8 and 14.

See Figures 3, 5, 8, Col. 5 lines 25-65; Col 7 lines 1-30; col. 8, line 21-Col. 9 line 49.
